

# Lecture Notes in Macroeconomics

Christian Groth

October 1, 2017

# Contents

<b>Preface</b>	<b>xvii</b>
<b>I THE FIELD AND BASIC CATEGORIES</b>	<b>1</b>
<b>1 Introduction</b>	<b>3</b>
1.1 Macroeconomics . . . . .	3
1.1.1 The field . . . . .	3
1.1.2 The different “runs” . . . . .	5
1.2 Elements of macroeconomic analysis . . . . .	8
1.2.1 Model elements . . . . .	8
1.2.2 From input to output . . . . .	11
1.3 Macroeconomic models and national income accounting . . . . .	15
1.4 Some terminological points . . . . .	15
1.5 Brief history of macroeconomics . . . . .	16
1.6 Literature notes . . . . .	17
<b>2 Review of technology and firms</b>	<b>19</b>
2.1 The production technology . . . . .	19
2.1.1 A neoclassical production function . . . . .	20
2.1.2 Returns to scale . . . . .	23
2.1.3 Properties of the production function under CRS . . . . .	29
2.2 Technological change . . . . .	32
2.3 The concepts of representative firm and aggregate production function . . . . .	38
2.4 The neoclassical competitive one-sector setup . . . . .	40
2.4.1 Profit maximization . . . . .	41
2.4.2 Clearing in factor markets . . . . .	45
2.5 More complex model structures* . . . . .	50
2.5.1 Convex capital installation costs . . . . .	50
2.5.2 Long-run versus short-run production functions . . . . .	51

2.5.3	A simple portrayal of price-making firms . . . . .	53
2.5.4	The financing of firms' operations . . . . .	57
2.6	Literature notes . . . . .	57
2.7	Appendix . . . . .	59
2.8	Exercises . . . . .	64
<b>II LOOKING AT THE LONG RUN</b>		<b>65</b>
<b>3</b>	<b>The basic OLG model: Diamond</b>	<b>67</b>
3.1	General motives for saving . . . . .	68
3.2	The model framework . . . . .	69
3.3	The saving by the young . . . . .	72
3.4	Production . . . . .	83
3.5	The dynamic path of the economy . . . . .	86
3.5.1	Technically feasible paths . . . . .	86
3.5.2	A temporary equilibrium . . . . .	87
3.5.3	An equilibrium path . . . . .	90
3.6	The golden rule and dynamic inefficiency . . . . .	105
3.7	Concluding remarks . . . . .	111
3.8	Literature notes . . . . .	112
3.9	Appendix . . . . .	113
3.10	Exercises . . . . .	121
<b>4</b>	<b>A growing economy</b>	<b>127</b>
4.1	Harrod-neutrality and Kaldor's stylized facts . . . . .	128
4.2	The Diamond OLG model with Harrod-neutral technological progress	139
4.3	The golden rule under Harrod-neutral technological progress . . . . .	145
4.4	The functional income distribution . . . . .	147
4.5	The elasticity of factor substitution . . . . .	151
4.6	The CES production function . . . . .	153
4.7	Concluding remarks . . . . .	159
4.8	Literature notes . . . . .	159
4.9	Appendix . . . . .	161
4.10	Exercises . . . . .	169
<b>5</b>	<b>Applying and extending the Diamond model</b>	<b>171</b>
5.1	Pension schemes and aggregate saving . . . . .	171
5.1.1	No national pension scheme . . . . .	173
5.1.2	Funded system . . . . .	174
5.1.3	Tax-based system . . . . .	176

5.1.4	Discussion . . . . .	181
5.2	Endogenous labor supply . . . . .	183
5.2.1	The intensive margin: A simple one-period model . . . . .	183
5.2.2	Endogenous labor supply in an extended Diamond model . . . . .	190
5.3	Early retirement with transfer income . . . . .	194
5.4	Intertemporal substitution of labor supply . . . . .	205
5.5	Concluding remarks . . . . .	211
5.6	Literature notes . . . . .	211
5.7	Appendix: The extended Slutsky equation . . . . .	212
<b>6</b>	<b>Long-run aspects of fiscal policy and public debt</b>	<b>215</b>
6.1	An overview of government spending and financing issues . . . . .	216
6.2	The government budget . . . . .	217
6.3	Government solvency and fiscal sustainability . . . . .	222
6.3.1	The critical role of the growth-corrected interest factor . . . . .	223
6.3.2	Sustainable fiscal policy . . . . .	226
6.4	Debt arithmetic . . . . .	227
6.4.1	The required primary budget surplus . . . . .	228
6.4.2	Case study: The Stability and Growth Pact of the EMU . . . . .	235
6.5	Solvency, the NPG condition, and the intertemporal government budget constraint . . . . .	243
6.5.1	When is the NPG condition necessary for solvency? . . . . .	243
6.5.2	Equivalence of NPG and GIBC . . . . .	246
6.6	A proper accounting of public investment* . . . . .	250
6.7	Ricardian equivalence? . . . . .	253
6.7.1	A small open OLG economy with a temporary budget deficit . . . . .	255
6.7.2	A one-off tax cut . . . . .	260
6.7.3	Widening the perspective . . . . .	264
6.8	Concluding remarks . . . . .	266
6.9	Literature notes . . . . .	267
6.10	Appendix A . . . . .	268
6.11	Exercises . . . . .	269
<b>7</b>	<b>Bequests and the modified golden rule</b>	<b>271</b>
7.1	Bequests . . . . .	271
7.2	Barro's dynasty model . . . . .	272
7.2.1	A forward-looking altruistic parent . . . . .	273
7.2.2	Case 1: the bequest motive operative ( $b_{t+1} > 0$ optimal) . . . . .	276
7.2.3	Case 2: the bequest motive not operative ( $b_{t+1} = 0$ optimal) . . . . .	282
7.2.4	Necessary and sufficient conditions for the bequest motive to be operative . . . . .	283

7.3	Bequests and Ricardian equivalence . . . . .	286
7.4	The modified golden rule when there is technological progress* . . . . .	292
7.5	Concluding remarks . . . . .	297
7.6	Literature notes . . . . .	298
7.7	Appendix . . . . .	299
7.8	Exercises . . . . .	303
<b>8</b>	<b>Optimal capital accumulation</b>	<b>305</b>
8.1	Command optimum . . . . .	305
8.1.1	A social planner . . . . .	306
8.1.2	The modified golden rule of the command optimum . . . . .	315
8.1.3	The turnpike property . . . . .	316
8.2	Optimal control theory and the social planner's problem* . . . . .	318
8.2.1	Decomposing the social planner's problem . . . . .	318
8.2.2	Applying the Maximum Principle . . . . .	322
8.3	The overtaking and catching-up criteria* . . . . .	334
8.4	Concluding remarks . . . . .	338
8.5	Literature notes . . . . .	339
8.6	Appendix . . . . .	340
8.7	Exercises . . . . .	356
<b>9</b>	<b>The intertemporal consumption-saving problem in discrete and continuous time</b>	<b>357</b>
9.1	Market conditions . . . . .	358
9.2	Maximizing discounted utility in discrete time . . . . .	360
9.3	Transition to continuous time analysis . . . . .	371
9.4	Maximizing discounted utility in continuous time . . . . .	377
9.4.1	The saving problem in continuous time . . . . .	377
9.4.2	Solving the saving problem . . . . .	380
9.4.3	The Keynes-Ramsey rule . . . . .	386
9.4.4	Mangasarian's sufficient conditions . . . . .	389
9.5	The consumption function . . . . .	389
9.6	Concluding remarks . . . . .	394
9.7	Literature notes . . . . .	394
9.8	Appendix . . . . .	395
9.9	Exercises . . . . .	403
<b>10</b>	<b>The basic representative agent model: Ramsey</b>	<b>405</b>
10.1	Preliminaries . . . . .	406
10.2	The agents . . . . .	407
10.2.1	Households . . . . .	407

10.2.2 Firms . . . . .	413
10.3 General equilibrium and dynamics . . . . .	414
10.4 Comparative analysis . . . . .	426
10.4.1 The role of key parameters . . . . .	426
10.4.2 Special case: Solow's growth model* . . . . .	428
10.5 A social planner's problem . . . . .	429
10.5.1 The equivalence theorem . . . . .	430
10.5.2 Ramsey's original zero discount rate and the overtaking criterion* . . . . .	433
10.6 Concluding remarks . . . . .	436
10.7 Literature notes . . . . .	437
10.8 Appendix . . . . .	438
10.9 Exercises . . . . .	446
<b>11 The Ramsey model in use</b>	<b>447</b>
11.1 Fiscal policy and announcement effects . . . . .	447
11.1.1 Public consumption financed by lump-sum taxes . . . . .	448
11.1.2 Income taxation . . . . .	453
11.1.3 Effects of shifts in the capital income tax rate . . . . .	456
11.1.4 Ricardian equivalence . . . . .	462
11.2 Learning by investing and investment-enhancing policy . . . . .	465
11.2.1 The common framework . . . . .	466
11.2.2 The arrow case: $\lambda < 1$ . . . . .	469
11.2.3 Romer's limiting case: $\lambda = 1, n = 0$ . . . . .	475
11.3 Concluding remarks . . . . .	482
11.4 Literature notes . . . . .	482
11.5 Appendix . . . . .	483
11.6 Exercises . . . . .	487
<b>12 Overlapping generations in continuous time</b>	<b>489</b>
12.1 Introduction . . . . .	489
12.2 The model of perpetual youth . . . . .	491
12.2.1 Households . . . . .	491
12.2.2 Aggregation . . . . .	500
12.2.3 The representative firm . . . . .	502
12.2.4 Dynamic general equilibrium (closed economy) . . . . .	503
12.3 Adding retirement . . . . .	515
12.4 The rate of return in the long run . . . . .	521
12.5 National wealth and foreign debt . . . . .	525
12.6 Concluding remarks . . . . .	534
12.7 Literature notes . . . . .	535

12.8 Appendix . . . . .	536
12.9 Exercises . . . . .	546
<b>13 General equilibrium analysis of public and foreign debt</b>	<b>547</b>
13.1 Reconsidering the issue of Ricardian equivalence . . . . .	547
13.2 Dynamic general equilibrium effects of lasting budget deficits . . .	555
13.3 Public and foreign debt: a small open economy . . . . .	570
13.4 Government debt when taxes are distortionary* . . . . .	582
13.5 Public debt policy . . . . .	589
13.6 Credibility problems due to time inconsistency . . . . .	589
13.7 Literature notes . . . . .	590
13.8 Appendix . . . . .	590
13.9 Exercises . . . . .	592
<b>III MODELING FIXED CAPITAL INVESTMENT</b>	<b>593</b>
<b>14 Fixed capital investment and Tobin's <math>q</math></b>	<b>595</b>
14.1 Convex capital installation costs . . . . .	597
14.1.1 The decision problem of the firm . . . . .	599
14.1.2 The implied investment function . . . . .	604
14.1.3 A not implausible special case . . . . .	605
14.2 Marginal $q$ and average $q$ . . . . .	608
14.3 Applications . . . . .	609
14.4 Concluding remarks . . . . .	617
14.5 Literature notes . . . . .	619
14.6 Appendix . . . . .	619
14.7 Exercises . . . . .	629
<b>15 Further applications of adjustment cost theory</b>	<b>631</b>
15.1 Oil price shock in a small oil-importing economy . . . . .	631
15.1.1 Three inputs: capital, labor, and raw material . . . . .	632
15.1.2 General equilibrium and dynamics . . . . .	637
15.1.3 National income accounting for an open economy with cap- ital installation costs . . . . .	641
15.1.4 Household behavior and financial wealth . . . . .	644
15.1.5 General aspects of modeling a small open economy . . . . .	648
15.2 Housing market dynamics . . . . .	649
15.2.1 The housing service market and the house market . . . . .	650
15.2.2 Residential construction . . . . .	653
15.2.3 Dynamics under perfect foresight . . . . .	658

15.2.4 Discussion . . . . .	663
15.3 Literature notes . . . . .	665
15.4 Appendix . . . . .	665
15.5 Exercises . . . . .	670
<b>IV MODELING MONEY</b>	<b>671</b>
<b>16 Money in macroeconomics</b>	<b>673</b>
16.1 What is money? . . . . .	673
16.1.1 The concept of money . . . . .	673
16.1.2 Historical remarks . . . . .	675
16.1.3 The functions of money . . . . .	676
16.2 The money supply . . . . .	677
16.2.1 Different measures of the money stock . . . . .	677
16.2.2 The money multiplier . . . . .	679
16.3 Money demand . . . . .	682
16.4 What is then the “money market”? . . . . .	683
16.5 Key questions in monetary theory and policy . . . . .	687
16.6 Literature notes . . . . .	688
16.7 Exercises . . . . .	689
<b>17 Inflation and capital accumulation: The Sidrauski model</b>	<b>691</b>
17.1 The agents . . . . .	692
17.2 Equilibrium and evolution over time . . . . .	699
17.3 Theoretical implications . . . . .	702
17.3.1 Money neutrality and superneutrality . . . . .	702
17.3.2 Milton Friedman’s zero interest rate rule . . . . .	706
17.3.3 Discussion . . . . .	708
17.4 Are inflation and deflation bubbles possible? . . . . .	710
17.5 Miscellaneous notes . . . . .	716
17.6 Literature notes . . . . .	717
17.7 Appendix . . . . .	717
17.8 Exercises . . . . .	721
<b>18 Wider perspectives on monetary economies</b>	<b>723</b>
18.1 Money growth and inflation in the long run . . . . .	723
18.2 Are neutrality and superneutrality of money theoretically robust properties? . . . . .	727
18.3 Inflationary public finance . . . . .	730
18.3.1 The seigniorage Laffer curve . . . . .	731

18.3.2	Hyperinflation . . . . .	734
18.4	Bridging the gap between the short and the long run . . . . .	740
18.4.1	The monetary transmission mechanism in the short and the long run . . . . .	741
18.4.2	Inflation - social costs and benefits . . . . .	743
18.5	A glimpse of theory of the “level of interest rates” . . . . .	747
18.6	Literature notes . . . . .	756
18.7	Appendix . . . . .	756
18.8	Exercises . . . . .	756
 <b>V LOOKING AT THE SHORT RUN</b>		 <b>757</b>
<b>19</b>	<b>The theory of effective demand</b>	<b>759</b>
19.1	Stylized facts about the short run . . . . .	760
19.2	A simple short-run model . . . . .	761
19.2.1	Elements of the model . . . . .	762
19.2.2	The case of competitive markets with fully flexible $W$ and $P$	764
19.2.3	The case of imperfect competition and $W$ and $P$ fixed in the short run . . . . .	768
19.2.4	Short-run adjustment dynamics* . . . . .	779
19.2.5	Digging deeper . . . . .	781
19.3	Price setting and menu costs . . . . .	782
19.3.1	Imperfect competition with price setters . . . . .	783
19.3.2	Price adjustment costs . . . . .	786
19.3.3	Menu costs in action . . . . .	791
19.4	Abundant capacity . . . . .	796
19.4.1	Putty-clay technology . . . . .	797
19.4.2	Capacity utilization and monopolistic-competitive equilib- rium . . . . .	798
19.4.3	Aggregation over different regimes* . . . . .	802
19.5	Concluding remarks . . . . .	805
19.6	Literature notes . . . . .	807
19.7	Appendix . . . . .	809
19.8	Exercises . . . . .	810
 <b>20</b>	 <b>General equilibrium under monopolistic competition</b>	 <b>811</b>
20.1	The emergence of new-Keynesian economics . . . . .	811
20.2	The Blanchard-Kiyotaki model of monopolistic competition . . . . .	813
20.2.1	Overview of agents’ decision problems . . . . .	814
20.2.2	The resulting behavior . . . . .	816

20.3	General equilibrium . . . . .	828
20.3.1	The case with flexible wages and prices . . . . .	828
20.3.2	The case with sticky wages and prices . . . . .	833
20.4	Spillover complementarity and multiple equilibria . . . . .	840
20.5	Concluding remarks . . . . .	842
20.6	Literature notes . . . . .	843
20.7	Appendix . . . . .	843
20.8	Exercises . . . . .	843
<b>21</b>	<b>The IS-LM model</b>	<b>845</b>
21.1	The building blocks . . . . .	846
21.1.1	The output market . . . . .	846
21.1.2	Asset markets . . . . .	850
21.2	Keynesian equilibrium . . . . .	851
21.3	Alternative monetary policy regimes . . . . .	854
21.3.1	Money stock rule . . . . .	854
21.3.2	Fixed interest rate rule . . . . .	860
21.3.3	Contra-cyclical interest rate rule . . . . .	869
21.4	Further aspects . . . . .	870
21.4.1	A liquidity trap . . . . .	870
21.4.2	The loanable funds theory of the interest rate . . . . .	872
21.5	Some robustness checks . . . . .	873
21.5.1	Presence of an interest rate spread (banks' lending rate = $i + \omega > i$ ). . . . .	873
21.5.2	What if households are infinitely-lived? . . . . .	874
21.6	Concluding remarks . . . . .	875
21.7	Literature notes . . . . .	876
21.8	Appendix . . . . .	877
21.9	Exercises . . . . .	877
<b>22</b>	<b>IS-LM dynamics with forward-looking expectations</b>	<b>879</b>
22.1	A dynamic IS-LM model . . . . .	880
22.2	Monetary policy regimes . . . . .	885
22.2.1	Policy regime $m$ : Money stock rule . . . . .	885
22.2.2	Policy regime $i$ : Fixed short-term interest rate . . . . .	898
22.2.3	Policy regime $i'$ : A contra-cyclical interest rate rule . . . . .	902
22.3	Discussion . . . . .	904
22.4	Literature notes . . . . .	905
22.5	Appendix . . . . .	905

<b>23</b>	<b>The open economy and alternative exchange rate regimes</b>	<b>911</b>
23.1	The Mundell-Fleming model . . . . .	914
23.1.1	The basic elements . . . . .	914
23.1.2	Fixed exchange rate . . . . .	917
23.1.3	Floating exchange rate . . . . .	918
23.1.4	Perspectives . . . . .	920
23.2	Dynamics under a fixed exchange rate . . . . .	921
23.3	Dynamics under a floating exchange rate: overshooting . . . . .	924
23.3.1	The model . . . . .	924
23.3.2	Unanticipated rise in the real money supply . . . . .	928
23.3.3	Anticipated rise in the money supply . . . . .	933
23.3.4	Monetary policy tightening . . . . .	937
23.4	Concluding remarks . . . . .	941
23.5	Literature notes . . . . .	941
23.6	Appendix . . . . .	942
23.7	Exercises . . . . .	943
<b>24</b>	<b>A closer look at the labor market</b>	<b>945</b>
24.1	Introduction . . . . .	945
24.2	Themes . . . . .	945
24.3	Problems . . . . .	946
<b>VI</b>	<b>UNCERTAINTY AND EXPECTATIONS</b>	<b>947</b>
<b>25</b>	<b>Uncertainty, rational expectations, and staggered wage setting</b>	<b>949</b>
25.1	Simple expectation formation hypotheses . . . . .	950
25.2	The rational expectations hypothesis . . . . .	951
25.2.1	Two model classes . . . . .	952
25.2.2	Rational expectations . . . . .	954
25.2.3	Solving a simple RE model . . . . .	956
25.3	Wage setting in advance . . . . .	960
25.4	A benchmark model with synchronous wage setting . . . . .	961
25.4.1	Wage setting one period in advance . . . . .	962
25.4.2	Solving the benchmark model . . . . .	965
25.5	Asynchronous wage setting for several periods: Fischer's approach	966
25.5.1	The original Fischer model . . . . .	967
25.5.2	A modified Fischer model . . . . .	971
25.6	Asynchronous wage setting with constant wage level for several periods: Taylor's model . . . . .	973
25.7	Conclusion . . . . .	980

25.8 Appendix . . . . .	982
25.9 Exercises . . . . .	989
<b>26 Forward-looking rational expectations</b>	<b>991</b>
26.1 Expectational difference equations . . . . .	991
26.2 Solutions when $ a  < 1$ . . . . .	994
26.2.1 Repeated forward substitution . . . . .	994
26.2.2 The fundamental solution . . . . .	995
26.2.3 Bubble solutions . . . . .	998
26.2.4 When rational bubbles in asset prices can or can not be ruled out . . . . .	1005
26.2.5 Time-dependent coefficients . . . . .	1010
26.2.6 Three classes of bubble processes . . . . .	1011
26.3 Solutions when $ a  > 1$ . . . . .	1013
26.4 Concluding remarks . . . . .	1014
26.5 Literature notes . . . . .	1015
26.6 Appendix . . . . .	1016
26.7 Exercises . . . . .	1020
<b>27 Applications to New Classical and Keynesian models</b>	<b>1025</b>
27.1 New Classical Macroeconomics . . . . .	1026
27.1.1 The New Classical school . . . . .	1026
27.1.2 An NCM model . . . . .	1026
27.1.3 Weak and strong policy ineffectiveness . . . . .	1036
27.1.4 Alternative specifications and extensions . . . . .	1042
27.1.5 Discussion . . . . .	1047
27.2 The Lucas critique of econometric policy evaluation . . . . .	1048
27.3 Paper money and hyperinflation . . . . .	1051
27.4 Announcement effects . . . . .	1054
27.5 Is increased wage flexibility stabilizing? . . . . .	1057
27.5.1 Dynamic AD-AS model with uncertainty and nominal rigidities . . . . .	1058
27.5.2 Dynamic responses . . . . .	1061
27.6 Depression economics . . . . .	1063
27.7 Conclusion . . . . .	1063
